## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 20 November 2000.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by the Ciccone reference (U.S. Patent 5,917,255)

Ciccone discloses in figure 3 an apparatus for providing method for enabling an IC, the method comprises steps of establishing an idle state that holds a portion of the IC in a reset condition when a power source is operably coupled to the IC (col. 1, lines 12-16 and col. 3, lines 12-27); receiving a power enable signal (MANUAL); enabling ,in response to the power enable signal, an on-chip power converter (transistors PWK and PMAM) of the IC to generate one supply (PORDC) from a power source (Vps); and when the one supply has reached a steady-state (col. 1, lines 61-67, col. 2, lines 1-5), enabling functionality of the IC as required by claim 1.

As to claim 2, signal PORX and column 4, lines 17-26, read on the recitation of claim.

As to claim 3, clock signal POR (col.4, line 6-16) meets the requirements of claims.

As to claim 4, it is noted that the feedback POR signal is for de-asserting the reset signal PORX (col. 4, lines 31-47).

As to claim 5, the scope of this claim is similar to the combination of claims 3 and 4.

Therefore, it is rejected for the same reason set forth above.

Art Unit: 2816

As to claim 9, PORDC is considered as a first supply generated from the power source and node CAP is considered as a second supply generated from the power source wherein the first and second supplies are produced by regulating energy transfer from a single *capacitor* NCAP.

***Allowable Subject Matter***

3. Claims 10-22 are allowed.

4. Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to disclose an apparatus and/or method comprising elements and steps as recited in claims. Specifically, none of the prior art teaches or suggests “enabling a band-gap reference that is used in generating the power converter regulation signals” as in claim 6; “generating a lock clock signal” as recited in claim 7; “a supply lock circuit” as recited in claim 10; and “processing module” and “memory” as recited on lines 3-12 of claim 14.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
